PDL Iconic® The next generation platform

PDL Iconic®

The new residential standard in electrical accessories that delivers clever efficiency to the home.

A stylish, modern range based on a slim, sleek, clean design. PDL's Iconic range features customisable skins and pictograms and blends in perfectly with any environment. Featuring innovative smart home functionality such as multi-way dimming, smart timers and dimmers, USB chargers and network connection points. Designed with electricians in mind, Iconic is easy to install and effortless to maintain.

PDL Iconic is available in four colours: Vivid White, Anthracite, Cool Grey, Warm Grey.

AN = Anthracite

VW = Vivid White

WY = Warm Grey

CY = Cool Grey

Bluetooth Low Energy
(BLE) connectivity

Simple configuration and control for lights, dimmers, or timers via the Wiser Room App on your phone or tablet.

24-hour timers, and 24-hour, 7 day scheduling time clocks program power to turn on at a time during the week and another on weekends e.g. for your heated towel rail in winter.

Switches, dimmers, and timers connect or pair point-to-point. There is no need for a router or hub or any special wiring. Connect with the PDL Wiser Home app on your smart phone or tablet to setup or control these devices, or simply press the button on the switch to activate.

PDL Iconic® Styl
Irresistibly beautiful

PDL Iconic® Styl

PDL Iconic Styl is the newest set of skins from PDL to complement the Iconic range of electrical accessories.

Iconic Styl's new skin design simply clips onto standard Iconic grids, which means you only need to carry one base range of mechs and grids, and mix-and-match skin options to suit your customers' preferences. It's simple efficiency that's sure to turn heads in any new build or renovation.

The Styl range is for home owners looking to achieve a modern and stylish interior design. It is available in three metallic shades and has a sharp, sophisticated appearance designed to suit any urban interior.

Key features:

- Anodised aluminium – sandblasted for a modern 'satin' appearance
- The flexibility of the new skin designs allows for all the major household solutions including switches, sockets and network connectivity
- Benefits from all the innovative Iconic platform technology, including Bluetooth Low Energy, ControlLink, USBs, mechs with LEDs and more
- Sophisticated and stylish, the new skins are available in three on-trend colours; Silver, Silver Shadow and Crowne

Irresistibly beautiful

(SV) Silver

(SH) Silver Shadow

(CE) Crowne

Leveraging state-of-the-art Infrared, or Dual Technologies, Schneider Electric’s ultra-sensitive Argus Occupancy Sensors offer you the ultimate in reliable, efficient and cost-effective indoor lighting control.

- > Suitable for most residential and commercial applications to control incandescent, halogen, fluorescent and CFL lamps
- > Dual-technology sensors are more sensitive towards smaller movements, ideal for office buildings
- > Infrared remote controllers are available to simply program the sensors

Notes

Distribution Equipment

Superboard Series

MACH3

45 and 60 way

BIGGER BOARDS

- More wiring space
- 58mm more room top and bottom
- Effectively double the amount of space

EXTRA WIRING ROOM**CABLE TIE ANCHORS**

- Built into the base

NEUTRAL & EARTH BAR LAYOUT

Improved and suited to AS/NZS 3000:2007

- Numbering engraved on mouldings

Offer your customers the best protection from electrical fires

Arc Fault Detection Device (AFDD) – an easy to install, cost effective solution to help keep your customers safe from electrical fires caused by arc faults.

Applications

Suitable for both new builds and retrofit.

Conforms to standard: IEC 62606

Electrical arc fault detection and fire prevention through installation in DIN rail mounted electrical panels for a wide variety of circuits including:

- Socket circuits
- Lighting circuits
- Power strips
- Wall mounted cables and sockets
- Circuits with junction boxes
- Circuits in harsh environments (such as moisture, heat, UV, rodents, vibration), ageing cables and connections.

Integrated Systems

Simple Control Solutions

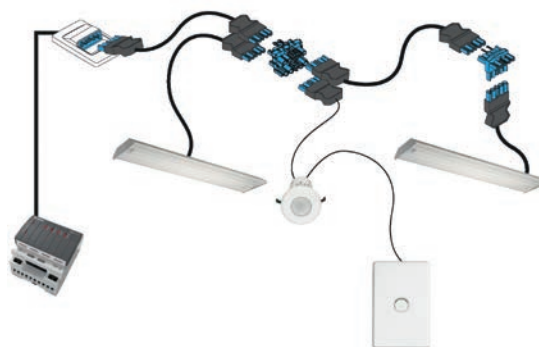

Smart Home Solution

The idea of having a smart home is exciting; however it can be confusing to know where to start and what it all really means. C-Bus Pre-programmed Pack home solution can provide a simplistic intelligent and automated operation of lighting and electrical devices throughout your home. A smart home enhances everyday lifestyle and allows your customer to take control of their home electrical system to suit their needs and budget. The C-Bus Pre-programmed Pack offers an easy to use lighting control system for your customers' home with set functions already programmed. It also provides them the power to set their own scenes for their home at the touch of a button. The idea around the C-Bus Pre-Programmed Pack is simple, with smart features that ANYONE can use. One of the most used features of C-Bus System is the 'All OFF' function. Another is customised scenes to switch multiple lights and the touch of ONE button. All C-Bus pre-programmed packs must be installed by a Schneider Electric Approved Installer or a New Zealand registered electrician.

DALIcontrol

Simple Solution

In today's world of digital lighting, DALI is regarded as the worldwide standard for control of commercial light fittings. The DALIcontrol 30 Mechs and Software, are suitable for a wide range of control functions in a commercial environment. Consider this. Your customer wants to be able to control lighting in a large open plan office area. They must comply with BCA Section J6 and have Greenstar energy efficiency objectives to meet, including perimeter dimming (daylight harvesting). They need the installation completed as part of the base build, across multiple levels in the building. They are unsure of the final layout of each level, but know that they need multiple switch groups, and different zones of lighting. This can be achieved simply and efficiently with Clipsals DALIcontrol Simple Solution, incorporating an extended range of 30 Series mechanisms including DALI Simple Wizard Software.

Enhance the experience

To upgrade your preprogrammed pack to a Complete Smart Home solution talk to one of our Schneider Electric Approved Installers.

An Approved Installer is someone who has been trained and approved by Schneider Electric as a specialist in using C-Bus and Dali Controls in any building. From system design, through to installation, then on to programming and commissioning, an Approved Installer will ensure that Wiser Home Control and/or Commercial Installations reach their full potential, delivering the best performance, functionality and most of all, value for money.

Schneider Electric is so confident in the work carried out by our Approved Installers, we will double our manufacturer's warranty on any project that has been inspected and endorsed as an "Approved Site".

Schneider Electric promotes the use of an Approved Installer to builders, commercial specifiers and homeowners; making them aware of the many reasons they should insist on an Approved Installer.

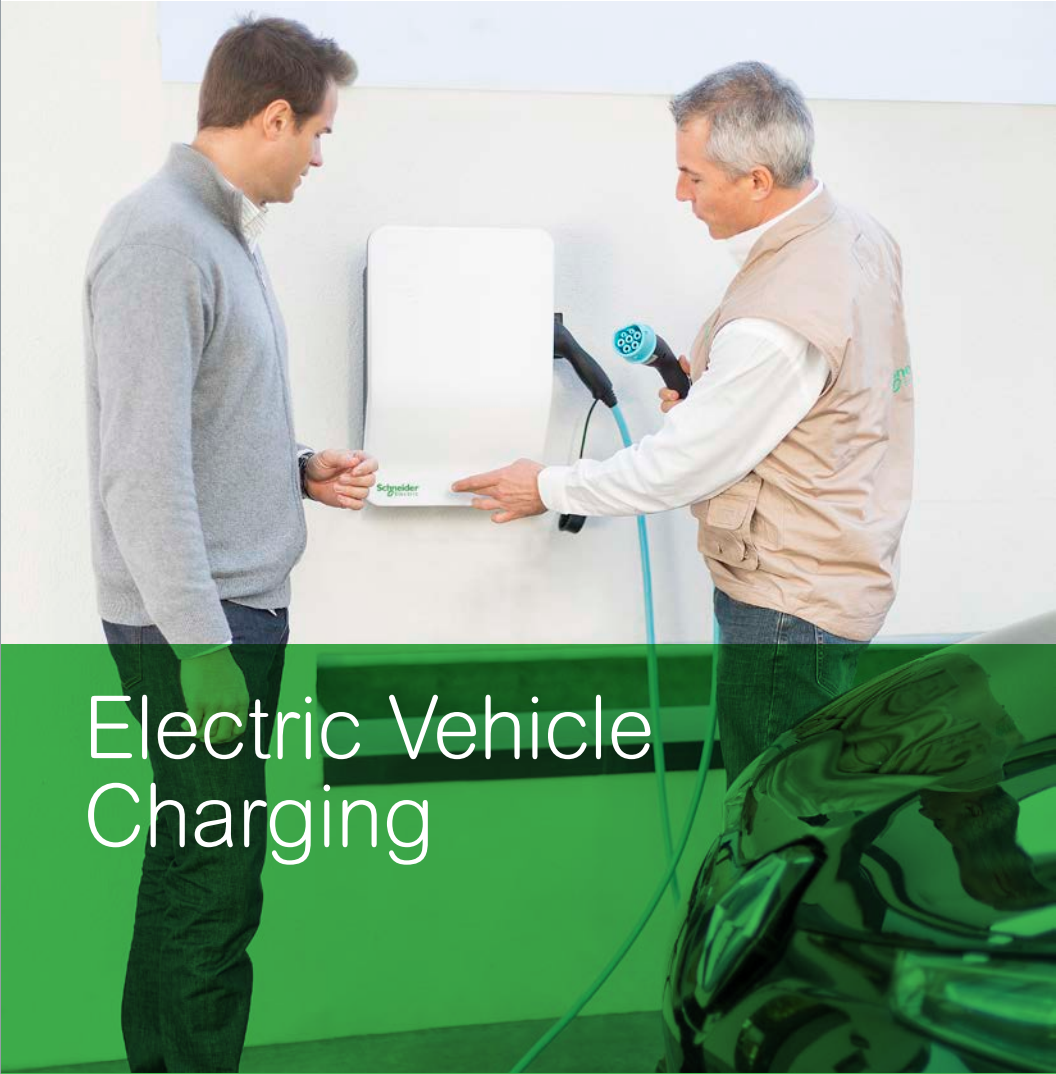

As part of the Approved Installer network you will have the training and accreditation to deliver the best result. For more information on becoming part of the Approved Installer network please contact your local Schneider Electric Representative.

EcoExperts

EcoExperts must be skilled in areas such as TCP/IP, lighting control design, building management systems, lighting principles, as well as sound understandings of Building Codes in New Zealand. They must also have the necessary resources to finance large scale projects, work within strict time frames, as well as managing OH&S guidelines and work practices. In addition Premium Partners must be capable of delivering professional detailed documentation and specifications for projects and tenders.

From design, documentation, installation and programming, through to commissioning after sales service, Premium Partners will assist the client in achieving their specific goals and requirements by working closely with them through the entire process to understand their specific needs and deliver a turn-key solution.

To find your local Approved Installer or Premium Partner, please visit www.schneider-electric.com/nz (Support, Where to buy) or contact your local sales representative.

A photograph showing two men standing next to a white Schneider electric vehicle charging station mounted on a wall. The man on the right, wearing a tan vest over a white shirt, is holding a blue charging cable and pointing at the station. The man on the left, wearing a grey sweater, is looking at the station. A green semi-transparent banner is overlaid at the bottom of the image, containing the text 'Electric Vehicle Charging'.

Electric Vehicle Charging

EVlink Wallbox

Electric vehicle charging for homes

The EVlink Wallbox was designed for homes or private properties, such as apartments, corporate car parks and hotels.

- Due to its robust and weatherproof design, it can be installed indoors or outdoors
- Simply connect the vehicle to the charging station: charging can start without specific action
- Charging can be stopped and then restarted using the Stop/Start button
- The charging power can be limited by any energy management device providing that this device is able to close a potential-free contact wired to the Wallbox
- Has a key lock as standard for access control
- Available in 1-phase at 7.4 kW and 3-phase at 11 and 22 kW

Industrial Electrical Accessories

56 Series™

Powered by Innovation

Providing superior user and installer solutions, the iconic 56 Series™ is taken to a new level. New range, new benefits, New Zealand tough.

Since the beginning of the 1980s the 56 Series™ has earned a reputation for top performance in resistance to the harsh treatment of industrial environments.

Introducing the NEW 56 Series™, a range with easier operation, improved strength and integrity, whilst maintaining the 56 Series™ heritage look, and being fully backwards compatible with the old range.

Design Innovation:

Several improvements have been made on the existing range through listening to our customers and making their requests a reality.

- Easier switch and socket operation
- Modern contoured profile
- 56 Series™ heritage look and fully backwards compatible
- Reduction of potential dirt build-up areas
- Improved strength and reliability

Patented gasket system

- Two grades of plastic using an over-moulded process
- IP66 without the use of No. 9 caps
- More rigidity
- Increased integrity of cover to enclosure seal

Laser engraved ratings

- The message is permanent and one of quality
- No more silver ratings labels that can fade or fall off
- Switch OFF/ON indicators raised and printed

Socket success

- Easier operation and opens further
- Strengthened hinge flap
- Co-injected flap gasket seal, improves sealing integrity
- More space to access plugs

56 Series™

Get the Facts

This new release takes the range to a new level, but the fundamental benefits that make 56 Series™ what it is today remain:

- Proven IP66 Protection
 - Laboratory tested and field proven
- Superior Impact Strength
 - Hi-impact polycarbonate materials used in 56 Series™ are proven and tested to operate in extreme temperatures from -40° to +55°C*
- High Level of Switch Performance
 - Rated up with the best in the business with most switches being motor rated with AC23A and AC3 to IEC60947-3
- Specially Formulated Chemical Resistance
 - In the conditions this range is required to operate, one plastic will not do for all. Resistant Orange and White have been developed for environments where harsh chemicals are used
- Solvent Bonding Capability
 - 56 Series™ PVC enclosures are able to be solvent bonded to standard PVC conduit fittings using recommended sealants.
- Greater UV Resistance
 - 56 Series™ materials are engineered and proven to provide a higher degree of protection than comparable products

- Full Range of Matching Gear
 - The most comprehensive range available catering for the complete solution, allowing the job to be done properly
- Modules Making Assembly Simple
 - From a single switch or socket, up to a full 16 gang station, the 100x100mm module design allows customer builds and modification to suit a massive range of requirements
- Quick, Easy, and Safe Wiring
 - Designed and engineered with the installer in mind, the 56 Series™ offers many simple and innovative features to assist

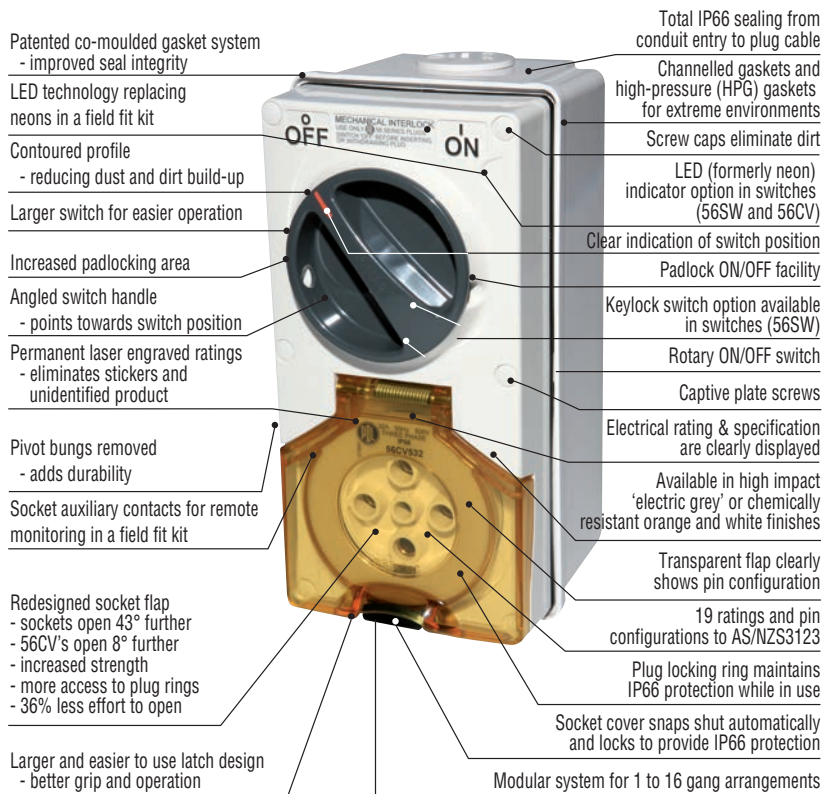

* Some products with electronic components do not reach these extremes, these will be listed with the accompanying installation guidelines

With features designed to outperform all other protected series

Features and benefits with the NEW range...

Fundamental to the range from 1981 to now...

PDL 56 Series – make the right choice

For optimum performance it's important to match your Industrial Switchgear's design and construction to your specific industry.

Neutral

Grey (GY)

General industrial use, chemically neutral, dusty or clean, wet or dry, indoors or out (UV resistant)

Ideal for use in:

- > Plant rooms
- > Warehouses/Distribution centres
- > Workshops
- > Assembly plants
- > Shopping centres
- > Tool rooms
- > Swimming centres
- > Material handling & transport

Alkaline

Chemical Resistant Grey (CG)

Resistant to caustic wash-down / alkali-based chemicals, dusty or clean, wet or dry, indoors only (not UV resistant)

Ideal for use in:

- > Caustic wash-down areas in food processing
- > Boning rooms
- > Abattoirs
- > Dairy processing plants
- > Seafood processing
- > Kitchens/production lines using commercial or industrial deep fryers

Acid

Chemical Resistant Orange (RO)

Chemical Resistant White (RW)

Resistant to acid base chemicals, dusty or clean, wet or dry, indoors or out (UV resistant)

Ideal for use in:

- > Citrus plants
- > Waste water treatment
- > Electroplating
- > Coal wash-down plants
- > Food preparation with acid based cleaners
- > Wineries
- > Breweries

Heavy Duty

Heavy Metal – WilcoROWCO

Heavy industrial applications, chemically neutral, dusty or clean, wet or dry, Indoors or outdoors, heavy impact areas, vandal prone areas

Ideal for use in:

- > Foundry, furnaces
- > Power generation & distribution
- > Cement plants
- > Quarries, open cut mines
- > Heavy transport
- > Welding outlets
- > Public areas

* K: Dedicated keyway configuration

^ Not available in White (RW). For pin configurations refer to 56 Series™

Product Master – pgs J7-J8.

QC = Quick connect terminals. Resistant Orange priced 5% more than standard.

Refer page J10 for MACTRO™ 'How to' Guide.

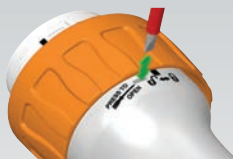

The MACTRO™ 'How To' Guide:

1: Open it

Unlocked

Place 56MACTRO unlocking tool into spring clip, **rotate** lock-nut to **unlocked**. Alternatively, insert screwdriver and **press** spring clip, then **rotate** lock-nut to **unlocked**.

Press clip once & **remove** screwdriver.

Twist plug body left to open.

No need to fully remove the cable nut, it can stay on!

2: Wire it

QC Spring Terminals – clamping on conductors.

Fully insert a flat screwdriver into the slot to open terminal.

Insert stripped non-twisted conductor and remove screwdriver.

Or... if using conventional screw terminals: Insert stripped conductors and tighten terminal screws.

3: Close it

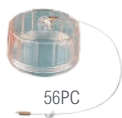

Align arrows, twist body right and **click** to close.

LOCK IT!

Locked

Tighten the cable gland until fully done up, then rotate the lock nut to **locked**.

-------------	---------	-------------------

Base Mount Switches, 415V 3 Phase

Introducing a range of 56 Series™ base mounted switch mechanisms. This range extension whilst boasting a list of new features and benefits maintains the 56 Series™ fundamentals that make 56 Series™ what it is today.

Features & Benefits

- Easier installation & maintenance resulting from the base mount switches which allow the cables to run directly into the switches.
- Clear access to terminals.
- High AC3, AC21A, AC23A and M ratings
- 20 – 63A, 3 & 4 pole options available.
- 2 Gang cover
- Same tough enclosure (enclosure sold separately)
- Retro fit multi gang enclosures
- GY, RO & RW colour and chemical resistant options (RO & RW not available in all variants)
- Compliant to all applicable AS/NZS & IEC standards

Base Mount Switches not available in CG.

56 Series™

BASE MOUNT VSD ISOLATOR WITH EMC KIT

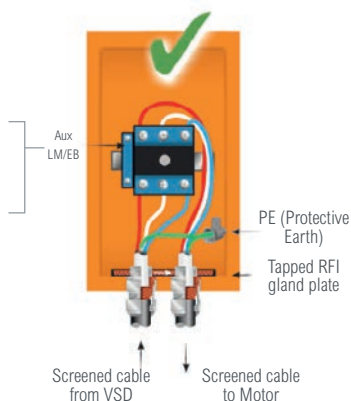

New addition, new benefits, New Zealand tough.

Introducing a range of 56 Series™ base mounted switch mechanisms. Now also catering for the VSD market offering a solution to your RFI screening requirements for VSD output motor isolation. This range extension offers the ability to add an early break auxiliary for a controlled power removal from the VSD.

Features & Benefits

- Base mount isolator makes for easier installation & maintenance
- Allows for screened VSD cables to run directly into the isolator whilst terminating cable screens and bonding them via a RFI/EMC gland plate.
- The ability to add an EB (early break) auxiliary for a controlled power removal from the VSD improves isolator life and prevents VSD from faulting when switching the field isolator.
- Clear access to terminals.
- AC23 motor rated for heavy-duty switch control
- Two x 8mm Lock OFF padlock facilities
- LED indicator switch options
- Single LED Kit "RED" Cat no. "56LEDK1"
- Triple LED kit "RED, BLUE, WHITE Cat no. "56LEDK3"
- Same tough enclosure
- Retro fit multi gang enclosures
- GY, RO & RW colour and chemical resistant options
- Compliant to all applicable AS/NZS & IEC standards
- Meets the requirements of Standards NZ Handbook "SNZ HB 6117:2014 Electrical Installations in dairy sheds"

Best Practice (Screened motor cable)

The Range

56 Series™ CATALOGUE No.	IEC60947-3 AC-23A Rating	3 Poles	-GY	-RO	-RW	Max cable size mm ²	Auxiliary – early break (K&N Part no.) (sold separately)

Medical Electrical Equipment

Medical Electrical Equipment

The Tools of a Specialist with a product history dating back over 30 years, the Medilec hospital product range comprises a wide range of electrical equipment for patient treatment areas of hospitals, medical and dental practices. Medical Service Panels The Medilec range consists of a number of different styles to suit the various needs of customers. From flush or surface mounted systems that are available in stainless steel or powder coated finishes, through to the very economical and modern moulded system based on the popular 2000 Series.

Electrocution Protection Equipment Medilec has a range of Electrocution Protection Equipment to meet all the requirements in patient treatment areas. Products include Line Isolation & Overload Monitors (LIOM), Isolation Transformers, Residual Current Devices (RCD), and Equipotential Junctions. Specialist Electrical Accessories Medilec has a range of accessories to meet all the requirements in patient treatment areas, including coloured socket outlets with power available indication, portable RCD protected socket outlets and area classification signs.

Medilec – Medical Electrical Equipment

ML2000 Series – Flush Mount Moulded

The ML2000 Moulded Series can either be purchased as individual catalogue items or as a complete medical service panel. The complete panel is made to order to meet the customer's individual requirements and can incorporate various services including power, lighting control, nurse call, data, phone etc.

ML2164 Series – Flush Mount Metal Plate

The ML2164 Flush Mount Metal Plate Series can either be purchased as individual catalogue items or as a complete medical service panel. The complete panel is made to order to meet the customers individual requirements and can incorporate various services including power, lighting control, nurse call, data, phone etc.

ESP Series – Flush Mount Metal Plate

The ESP Surface Flush Series can either be purchased as individual catalogue items or as a custom medical service panel. The custom panel is made to order to meet the customers individual requirements and can incorporate various services including power, lighting control, nurse call, data, phone etc.

Please note that the standard switched outlet panels detailed in this section require an additional power available neon if they are going to be protected by an RCD. All items require an additional recessed wall box.

ML2000 Series

This range is available in White Electric (WE), Red (RD) and Dark Blue (DB).

Notes

Powerguard RCD Protection

Protect yourself
and your assets

The easy economical way to safeguard yourself when working with electricity

Powerguard protects both your people and your equipment from harmful shocks around the home and building site

Accurate electronic technology is used to constantly monitor the balance of current flow to detect even minor leakage in power tools, extension leads and others such as electric lawnmowers, trimmers, BBQ's and temporary party lighting as well as pool vacuums, filters, spas and any other outdoor equipment. Dampness, faulty wiring, frayed cords, damage and other hazards in the workshop, home or outdoors can all be greatly protected against causing a lethal situation.

30mA and 10mA versions available for Equipment and Person Protection applications, in either white (WH) or Orange (OR). Indoor, Power Socket Outlet and Plugtop versions as well as outdoor, Extension Leads, Re-wirable and Portable devices.

IP Ratings

1st Figure

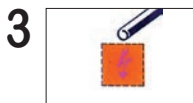

Protection against solid objects.

Protected against solid bodies greater than 50mm (e.g. involuntary hand contact).

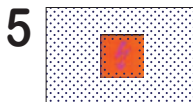

Protected against solid bodies larger than 12mm (e.g. finger of the hand).

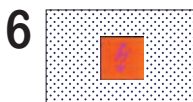

Protected against solid bodies larger than 2.5mm (e.g. tools, wire).

Protected against solid bodies larger than 1mm (e.g. fine tools and small wires).

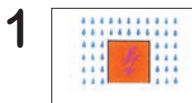

Protected against dust (no harmful deposits).

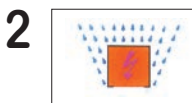

Completely protected against dust.

2nd Figure

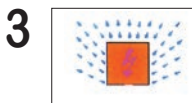

Protection against harmful ingress of water.

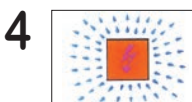

Protected against vertically falling drops of water.

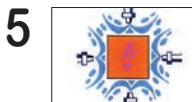

Protected against drops of water falling at up to 15° from the vertical.

Protected against spraying water at up to 60° from the vertical.

Protected against splashing water from all directions.

Protected against jets of water from all directions.

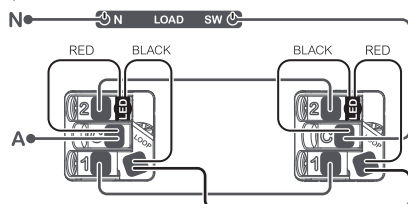

Protected against jets of water of similar force to heavy seas.

Wiring Diagrams

PDL Iconic

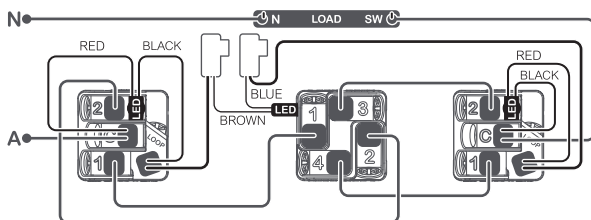

Iconic – 2 way switching with LED indication

(Switch mech LED indicator ON when switch is OFF)

Iconic – Multiway switching with LED indication

(Switch mech LED indicator ON when switch is OFF)

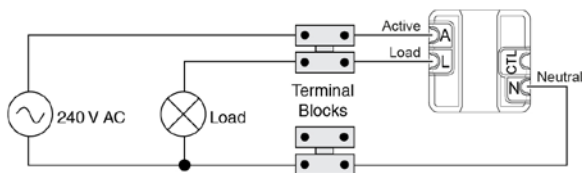

Wiring Diagrams

PDL Iconic - Pushbutton Electronic Switch / Timer / Timeclock

Note – Push Button Electronic Switch output is latching; Both Timers & Timeclocks can also be configured to be used as a simple push button with output either latching or momentary.

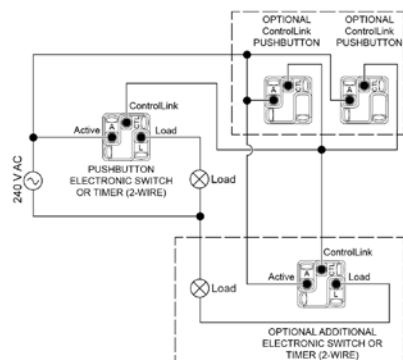

- 2 wire products – use when no neutral is available.
Minimum load ~10W, maximum 350W. If mech LED starts to flicker use a load correction device (S31LCDA)
- 3 wire products – recommended over 2 wire products.
No minimum load, higher maximum loads - 6A or 10A products. Uses an internal latching relay which consumes no power – only during change of state.

3 wire 6A – 356PB## Push Button, 348PB## Timer, 346PB## Timeclock

2 wire 350W – 356PBSM## Push Button, 348PBTM## Timer

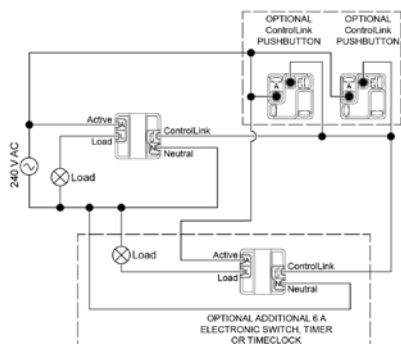

(OPTIONAL - ControlLink Push Button 356PBSS)

Wiring Diagrams

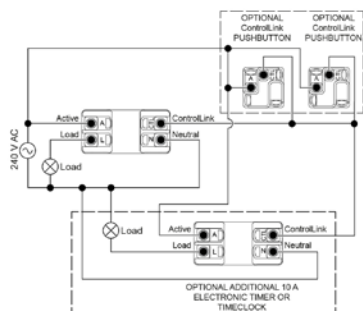

6A units – 356PBTMBT, 348PB6TMBT Push Button

(OPTIONAL - ControlLink Push Button 356PBSS)

10A units – 348PB10TMBT, 346PB10TCMBT Time Clock

(OPTIONAL - ControlLink Push Button 356PBSS)

Wiring Diagrams

Electrical Specifications – Iconic - Pushbutton Electronic Switch / Timer / Timeclock

Parameter	2-wire 350 W Units	3-wire 6 A Units	3-wire 10 A Units
Nominal Operating Voltage	220-240 V AC		
Nominal Operating Frequency	50 Hz		
Minimum Load Rating	10W	0A	0A
Maximum Load Rating	350 W	6 A	10A
Switching Technique	Semiconductor	Relay	Relay
Wiring Configuration:			
Incandescent Loads	350 W	6 A	10 A
MV Halogen Loads	350 W	6 A	10 A
Electronic LV Lighting Transformers	350 W	6 A	10 A
Iron Core LV Lighting Transformers (EI and Toroidal Types)	350 W	6 A	10 A
Linear Fluorescent Ballasts	250 W	6 A	10 A
Compact Fluorescent Loads	250 W	6 A	10 A
LED Lighting Drivers	350 W (Dimmable) 250 W (Non-Dim.)	6 A	10 A
Inductive Loads (e.g. Small Motors such as Ceiling Exhaust Fans)	Not Compatible	6 A @ 0.8 Power Factor	10 A @ 0.8 Power Factor
Purely Resistive Loads	350 W	6 A	15 A
Voltage / Frequency Stability	YES		
Over-current / Thermal Fuse Protection	YES	NO	NO
Over-temperature Protection	YES		
Short Circuit Protection	YES	NO	NO
BLE-enabled	NO	YES	YES
LED Indicator	YES		
Multi-Way Control	YES		

*Minimum load is approximately 10W, this can be higher depending on different products.
If in doubt use Clipsal downlights - these are tested to 10W minimum loads on 2 wire products.

Multi-Gang Derating

For applications where Iconic Pushbutton Electronic Switches, Timers and Time-clocks are multi-ganged, derate the maximum load rating of each unit according to the derating table shown below.

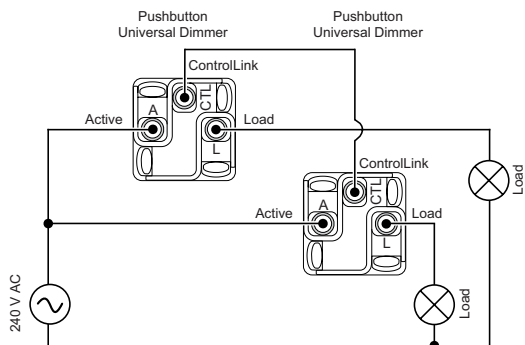

Primary Mechanisms per Plate	Max. Load per Primary Mechanism		
	(2-Wire Units)	(6 A Units)	(10 A Units)
1	350 W	6 A	10 A
2	250 W	4.5 A	7.5 A
3	220 W	4 A	6.5 A
4	175 W	3 A	N/A
5	120 W	2 A	N/A
6	100 W	1.5 A	N/A

NOTICE: Only Primary Units need be derated. Multi-Way Remote Units on the same plate can be ignored for the purpose of multi-gang derating.

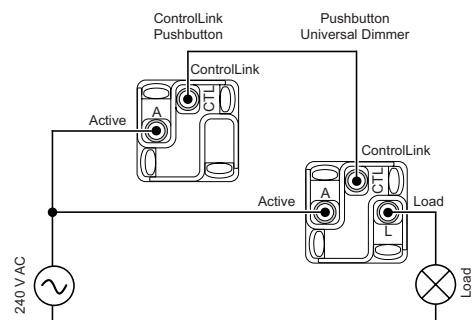

Wiring Diagrams

PDL Iconic Dimmers

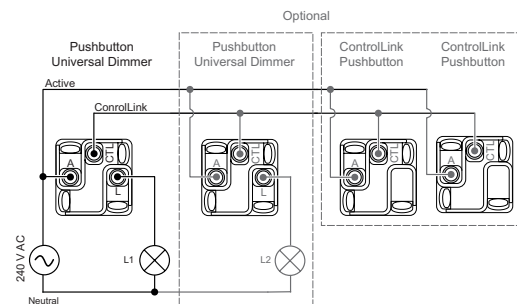

Dimmer Wiring – Two Way

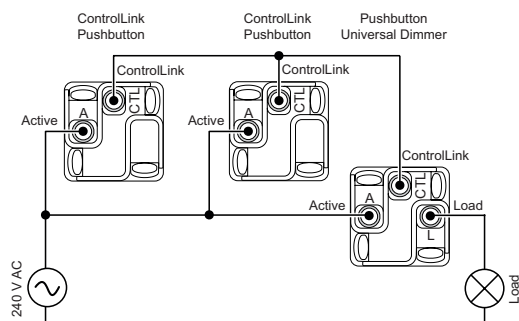

Dimmer Wiring – Two Way using ControlLink

Dimmer Wiring – Two Way using ControlLink

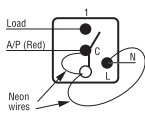

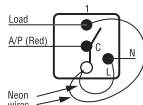

Wiring Diagrams

680M16N and 680M16NPS One way switches with neon (rear view)

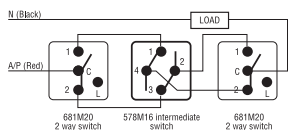

Neon permanently ON

Neon ON, switch ON (indicator)

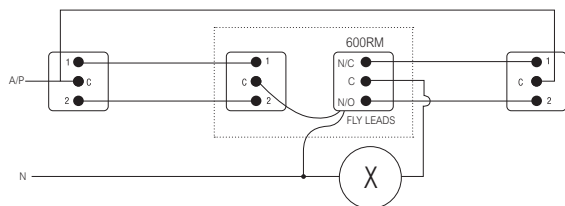

678M16 Intermediate Switch Rear view of switch modules

Any number of intermediate switches can be wired between the 2 way switches.

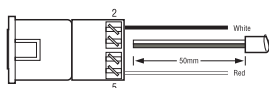

2 Way Switch used as an Intermediate via 600RM

*600RM can be placed into wall/flush box and used with any plate range.

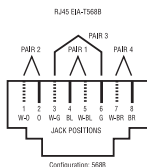

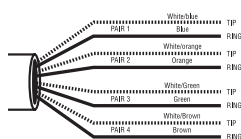

617M2 BT Telephone Sockets

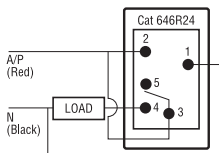

617M module

Use 500TT tool to insert wires (Ø 0.5mm) to IDC terminals, max one wire per terminal slot.

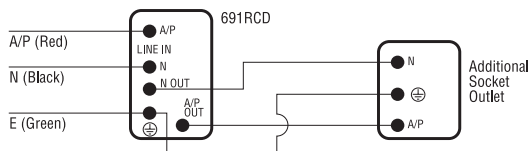

619MD Standard wiring for RJ45 Jack (Jack face shown)

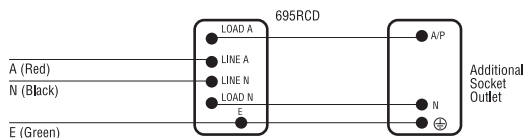

Wiring Diagrams

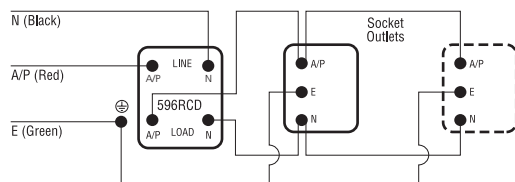

691RCD (10 and 30mA)

695RCD (10 and 30mA)

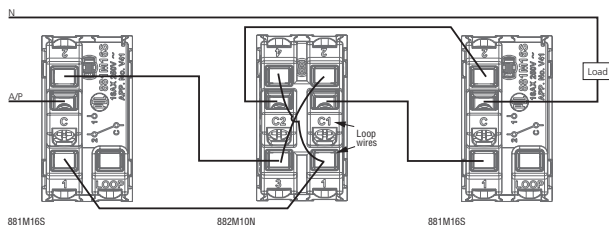

896RCD, 696RCD and 596RCD (10 and 30mA)

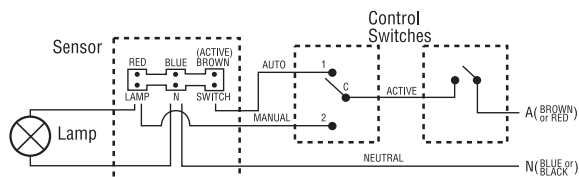

882M10N Intermediate Switch Module

Any number of intermediate switches can be wired between the 2 way switches

Sensor Auto By-Pass (Permanently On)

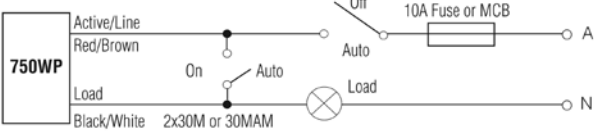

Wiring Diagrams

750WP & 753 2 Wire Infrascan®

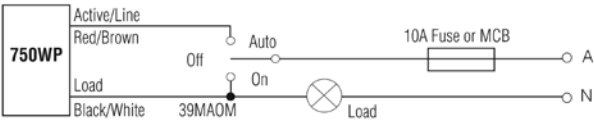

1a) Automatic Operation

1b) Automatic with manual override ON or OFF

1c) ON, OFF or AUTOMATIC Operation using a 3 position switch

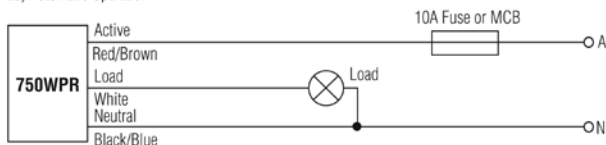

Note:

- When switching to Auto for any of the above configurations the Infrascan will turn on. Allow 30 seconds plus time-on period for the sensor to stabilise for normal operation. Wiring diagram 1(a), without override switches is preferred as there is no settling period.
- More than one 750WP CANNOT be connected in parallel to a common load. If parallel connection of multiple devices to control a common load is required, use Cat. No. 750WPR.

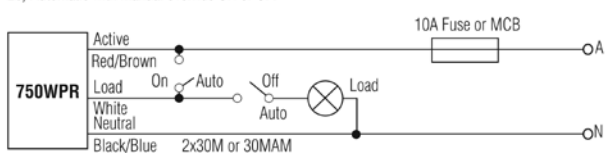

Wiring Diagrams

750WPR & 753R 3 Wire Infrascan®

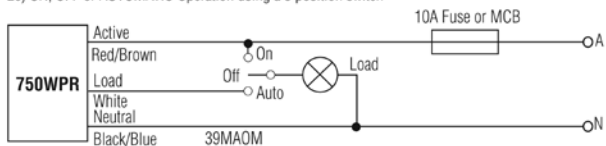

2a) Automatic Operation

2b) Automatic with manual override ON or OFF

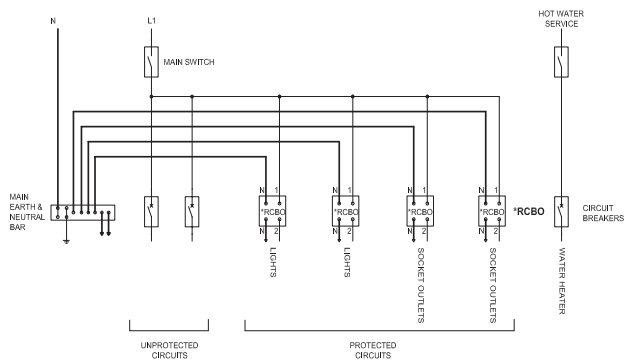

2c) ON, OFF or AUTOMATIC Operation using a 3 position switch

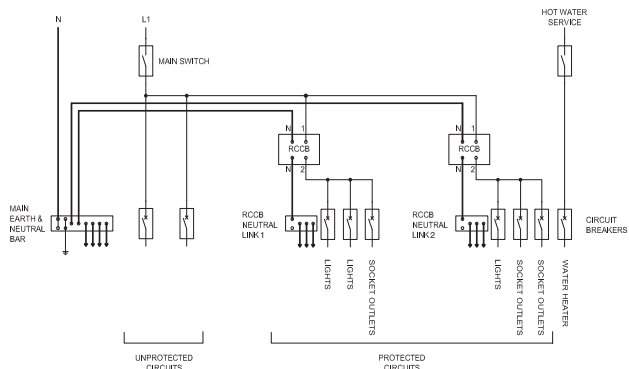

Wiring Diagrams

Option 1 – RCBO

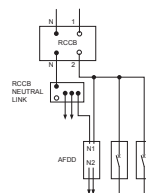

Option 2 – RCCB

Minimum of two RCD devices in domestic installations having more than one final subcircuit, and that each RCD shall supply a maximum of three final subcircuits.

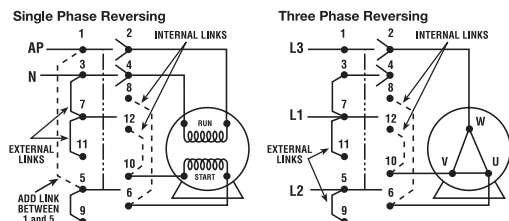

AFDD

Example of Arc Fault Detection Device Note - AFDD product shown includes MCB protection in one single unit.

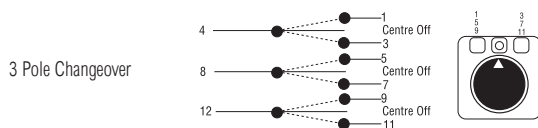

Wiring Diagrams

56SW320F/R

56SW320C/O and 56SW332C/O
