

Elevate Every Install with new Resi9 Boards

Today's homes are smarter, more connected, and more energy-conscious than ever. With the rise of EV chargers, solar systems, smart meters, and enhanced protection devices, the humble switchboard has never been more important.

PDL's new Resi9 combined Meter and Data board meet this challenge head-on by providing a full metal enclosure solution, giving sparkies the opportunity to raise the bar in installation performance, professionalism and speed.

Designed alongside sparkies for sparkies, the new Resi9 boards deliver:

MAX Professionalism

Sleek and consistent design across meter and data board

MAX Ease

One comprehensive Resi9 range for residential installation that complements the revolutionary RCBO + MAXBAR

MAX Space

150mm between rows, extra space for cable routing

MAX Performance

100A rated, 6kA system compliant with AS/NZS 61439.3

MAX Flexibility

Reversible door, board orientation & adjustable neutral stud position
